- Applying specific algorithms to solve problems

ORGANIZATIONS:

İrəliləyiş Project (12 /2021 - 2 /2022)
volunteer

TECHNICAL SKILLS:

HTML & CSS

SASS(SCSS)

Bootstrap

Responsive design

Javascript

jQuery

Basics of ReactJS

Git & GitHub

Fetch API

Redux Toolkit

Basics of MySQL

NodeJS

PHP

Laravel Framework

MVC Pattern

OOP

REST API

PROJECTS:

Steak In

- A website built on React.js and styled with SCSS. It includes key pages such as Home, Our Story, Menu, Shop, and Add to Cart, offering intuitive navigation and ordering capabilities. It also features functionalities like menu filtering and increasing orders in the cart.

Sky Sphinx

- Using HTML, CSS, and JavaScript, this project provides users with current weather information such as temperature, humidity, and wind speed based on their city/country search. It also stores the last 5 searched cities' weather data using local storage.

Filmalisa

- This project, built on HTML, CSS, and JavaScript, allows you to add, delete, and update movies via an admin panel. It is a collaborative project developed in coordination with a backend based on a real API.

CERTIFICATES:

Javascript Essentials 1 (JSE)

Cisco

Responsive Design

codecademy

CSS course

Hackerrank

LANGUAGE SKILLS:

Azerbaijani - Native

[Fluent Proficiency](#)

English - A2

[Elementary Proficiency](#)

Russian - A1

[Beginnery Proficiency](#)

SOFT SKILLS:

Time Management

Communication

Teamwork

Problem Solving

Motivation

Critical Thinking

Decision Making
